15% Organic Traffic Growth **Page 1** Google Rankings **70+** Leads/Month **Rs.2L+** Monthly Ads Budget
8+ Years Experience

PROFESSIONAL SUMMARY

AI-Powered Digital Marketing Specialist who turns 8+ years of SEO, PPC, and content expertise into measurable revenue growth: 15% organic traffic growth, first-page Google rankings, and 70+ qualified leads per month while managing Rs.2,00,000+ in monthly ad spend. Self-taught in Generative AI and AI development, with three live AI tools built and shipped on GitHub. Brings a rare hybrid skillset, pairing deep marketing instincts with hands-on engineering ability in OpenAI API, Gemini AI, and AI agent design, built to create intelligent systems that drive acquisition, visibility, and ROI.

PROFESSIONAL EXPERIENCE

Digital Marketing Specialist | Autozilla Software Solutions Pvt Ltd

May 2023 – Present • Hyderabad, India

- Grew organic website traffic by 15% through structured SEO audits, keyword gap analysis, content optimization, and technical issue resolution
- Secured first-page Google rankings for high-value competitive keywords, directly improving qualified inbound traffic
- Generated 70+ qualified leads per month by aligning SEO, Google Ads, and landing page strategy into a unified conversion funnel
- Managed Google Ads budgets exceeding Rs.2,00,000 per month, consistently optimizing for cost-per-lead and return on ad spend
- Built AI-assisted content workflows using Generative AI tools to accelerate content production and improve search relevance
- Delivered performance dashboards and actionable insights to stakeholders using GA4 and Looker Studio
- Ran A/B tests on landing pages, ad copy, and CTAs, applying findings to improve conversion rates across campaigns
- Performed ongoing competitor analysis and search intent mapping to identify ranking opportunities and content gaps

Campaign Specialist | Pranathi Software Services Pvt Ltd

Jun 2022 – May 2023 • Hyderabad, India

- Managed SEO, PPC, and paid social campaigns across multiple client accounts, improving keyword quality scores and reducing CPCs
- Planned and executed LinkedIn Ads campaigns to drive B2B lead generation, targeting professionals by industry, job title, and seniority
- Optimized bids, audience segments, and ad schedules to improve ROAS and reduce wasted ad spend across accounts
- Built and presented weekly KPI reports tracking impressions, CTR, conversions, and revenue attribution

- Identified underperforming campaigns through Google Analytics and implemented targeted fixes that improved click-through and conversion rates

Digital Marketing Executive | *FAMA Technologies*

Feb 2021 – May 2022 • Hyderabad, India

- Planned and executed integrated SEO, PPC, and content marketing campaigns that increased organic sessions and inbound enquiries
- Ran A/B and multivariate tests on landing pages and ad creatives, using data to guide ongoing CRO improvements
- Conducted technical SEO audits identifying crawl errors, page speed issues, and schema gaps, coordinating fixes with the development team
- Worked with content writers to produce optimized, search-intent-aligned articles that improved topical authority and rankings

Digital Marketing Executive | *E-Rad Imaging & Reporting Services Pvt Ltd*

Jun 2019 – Sep 2020 • Hyderabad, India

- Managed end-to-end SEO campaigns including keyword research, on-page optimization, link building, and monthly performance reporting
- Delivered monthly SEO audit reports with prioritized action plans that progressively improved domain visibility and organic rankings
- Executed off-page SEO strategies including guest posting and directory submissions to build domain authority

SEO & SMO Expert | *Promantra Synergies Pvt Ltd*

Nov 2017 – May 2019 • Hyderabad, India

- Led SEO and social media marketing campaigns that increased brand visibility and organic reach across search and social channels
- Developed content and engagement strategies for social media platforms aligned with keyword and audience targeting goals
- Conducted regular competitor benchmarking and link-building outreach to strengthen domain authority

SEO Executive | *Digital Way Soft*

Jan 2015 – Nov 2017 • Hyderabad, India

- Executed technical SEO, on-page optimization, off-page link building, and keyword research across multiple client websites
- Improved organic search rankings through structured content optimization, internal linking, and meta tag improvements

Software / Junior Test Engineer | *Ainslee Software Technologies & Corbz Data Info Solutions*

May 2007 – Sep 2014 • Hyderabad, India

- Designed and executed test plans, test cases, and defect reports across web and enterprise software projects; supported functional, regression, and UAT testing cycles
- Developed strong analytical, root cause analysis, and documentation skills that directly inform data-driven marketing decision making today

AI & TECHNOLOGY PROJECTS

AI SEO Agent *TypeScript • Gemini AI • Node.js • SQLite • Vite*

github.com/mvamshi56/seoagent

- Built a full-stack AI SEO audit tool using TypeScript and Gemini AI, capable of crawling websites, analyzing on-page SEO factors, and generating automated optimization recommendations

- Integrated SQLite for persistent audit data storage and Playwright for headless browser crawling, enabling deep technical SEO analysis at scale
- Deployed as a live web application on Google AI Studio, demonstrating end-to-end product development from concept to production

AI Web Summarizer *JavaScript • HTML • Groq AI • Chrome Extension*

github.com/mvamshi56/AI-Web-Summarizer

- Built a lightweight Chrome extension powered by Groq AI that extracts and summarizes web page content in real time, optimized for low-RAM systems
- Implemented a clean popup UI with configurable options, enabling marketers and researchers to digest long-form content instantly without leaving the browser
- Published under MIT open-source license, with popup, content script, and options modules structured for extensibility

AI Security Intelligence Platform *TypeScript • Gemini AI • MCP Server • Node.js*

github.com/mvamshi56/AI-SECURITY

- Developed an AI-powered security intelligence platform featuring an MCP (Model Context Protocol) server architecture for structured vulnerability assessment and risk analysis workflows
- Architected a client-server model with a dedicated AI-driven security analysis server and a TypeScript client managing component communication, applying AI agent design skills beyond marketing
